What can I do to improve things for myself and others?

Maybe I can join those who work for freedom in the digital era.

...contribute with my own hands and resources to Free Software and its values.

...become part of a community of volunteers working for freedom and individual control of data and software.

...walk with them, for a world of social justice, freedom and democracy.

...and take part directly in the organisation and its campaigns if I want to.

I can do all that by joining the FSFE Fellowship, or helping a friend to join.

Join FSFE’s Fellowship today. **Empower yourself and help others**, towards freedom in the digital age.
